

ABOUT US

Hampton Aviation specializes in heavy structural repair, maintenance, modifications, and more on any aircraft from piston singles to cabin class turbines. Our goal is to return your aircraft in better condition than it was before the incident.

Since 1965, Hampton Aviation has maintained a singular focus: taking care of our customers. As experts in the industry of aviation service and repair, we've spent our existence doing just that—performing repairs, maintenance, and modifications on an extensive list of aircraft. With our proven combination of quality, cost effectiveness, and turn around time, we can confidently say that Hampton Aviation is unlike any other structural repair facility in the industry.

Call us today for an estimate.

- Only NFPA 409 compliant paint facility in Mena, AR

One thing is obvious: Hampton Aviation cares about quality.

Please thank the pros who worked on my airplane. Their work was beautiful. It is obvious they have the kind of skill that requires both talent and a wealth of experience. The reason I chose Hampton is their quiet confidence that whatever they touch isn't just going to be repaired, it will be as good—or better—than new.”

-Michael Minton

QUALITY

“My Cessna Skylane flies at or slightly better than the book numbers. I can place the plane in a turn, trim it and she will stay in that turn with the ball centered and hands off. My friends were impressed as well as my IA and the local FAA inspector. I freely tell all who will listen about a man from Mena who did what he said he would, within the cost we agreed.”

-Robert Hall

VALUE

At Hampton Aviation, we are committed to providing our customers with the best value possible. Whether this means conceiving a tool design and building it right in our shop, or fabricating specific parts that are no longer available, Hampton Aviation is always one step ahead.

You can rest assured that your estimate will reflect the best cost savings tactics available.

EXPERIENCE

Of our 30 technicians on staff, 25 are certified, and we have 696 total years of combined experience in the aviation industry. Our office personnel have extensive experience working closely with major aviation insurance adjusters throughout the United States and can efficiently process the paperwork needed to begin work on your aircraft.

You will not find a more talented, professional, or hard working staff anywhere in the industry.
