

To: Hampton Aviation  
Letter of Appreciation

November 30, 2010

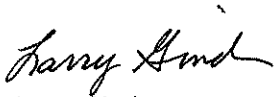

The purpose of this note is to thank Hampton Aviation for the outstanding work and unparalleled service you have provided the US Army and its crewmembers flying the C-12 model aircraft during my tenure as Program Director, DynCorp International, C-12 Life Cycle Contractor Support (LCCS) Program.

No task has been too small or too large for a small business out of Mena, AR, named Hampton Aviation.

- You singlehandedly extended the useful life for over 20 mission critical aircraft for the Fixed Wing PMO, PEO Aviation, and the US Army. Put another way, you solved a problem that had been brewing for years and did it in a *highly professional and seamless manner* with the Prime, DI, and the Fixed PMO while saving the Government millions of dollars in replacement cost for new airframes.
- When aircraft were damaged in a terrorist raid in a theater of war, DI turned to you for help in getting *mission critical* aircraft requiring depot repairs flyable again in the shortest period of time. You did just that again in a professional and seamless manner.
- Finally, who can forget the effort you managed for DI in Kosovo when a prop dropped off a C-12 on short final and heavy maintenance was required in an austere and potentially hostile environment. Again, Hampton Aviation assisted where needed and performed outstanding work in a *completely efficient and thoroughly professional manner*.

As DI stands down on this contract and transitions to another vendor who I am sure will be just as happy with your work, I want to give Hampton Aviation and all its employees a well deserved thank you for exceptional performance on the job.

With sincerest regards,

Larry Ginder  
Program Director, LCCS  
DynCorp International
